

Build Week II - Giorno 5

Obiettivo

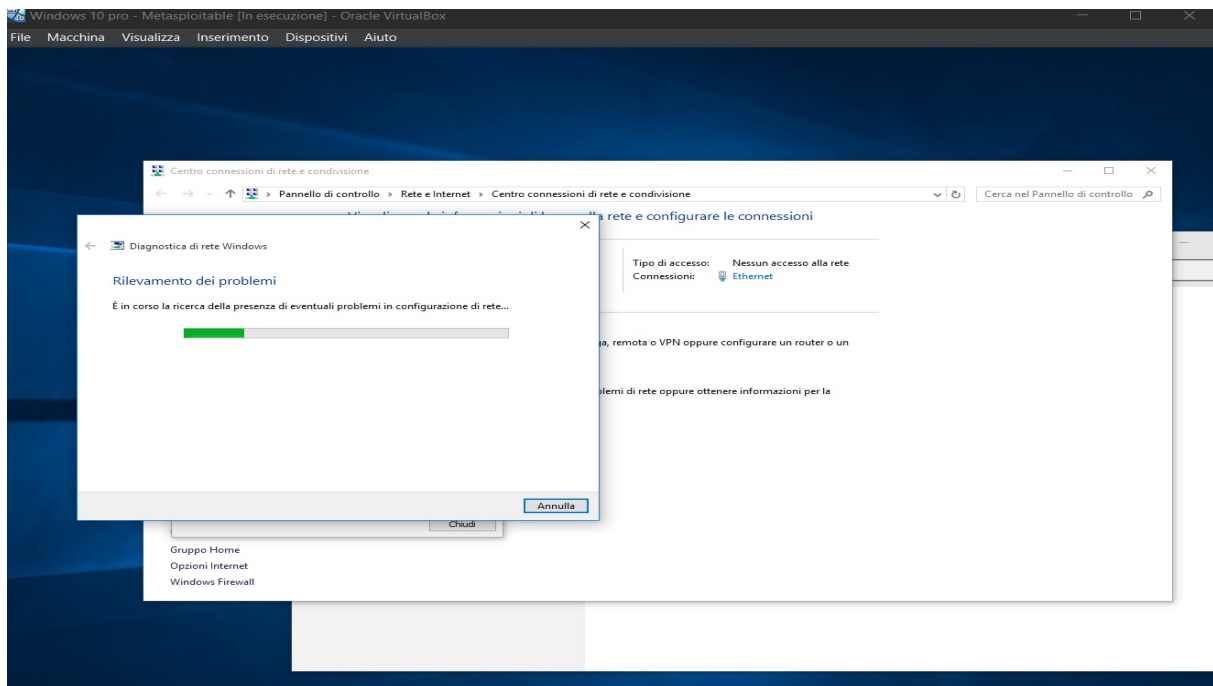

Sfruttamento controllato di una macchina Windows 10 vulnerabile mediante Metasploit in ambiente di laboratorio.

Passaggi svolti

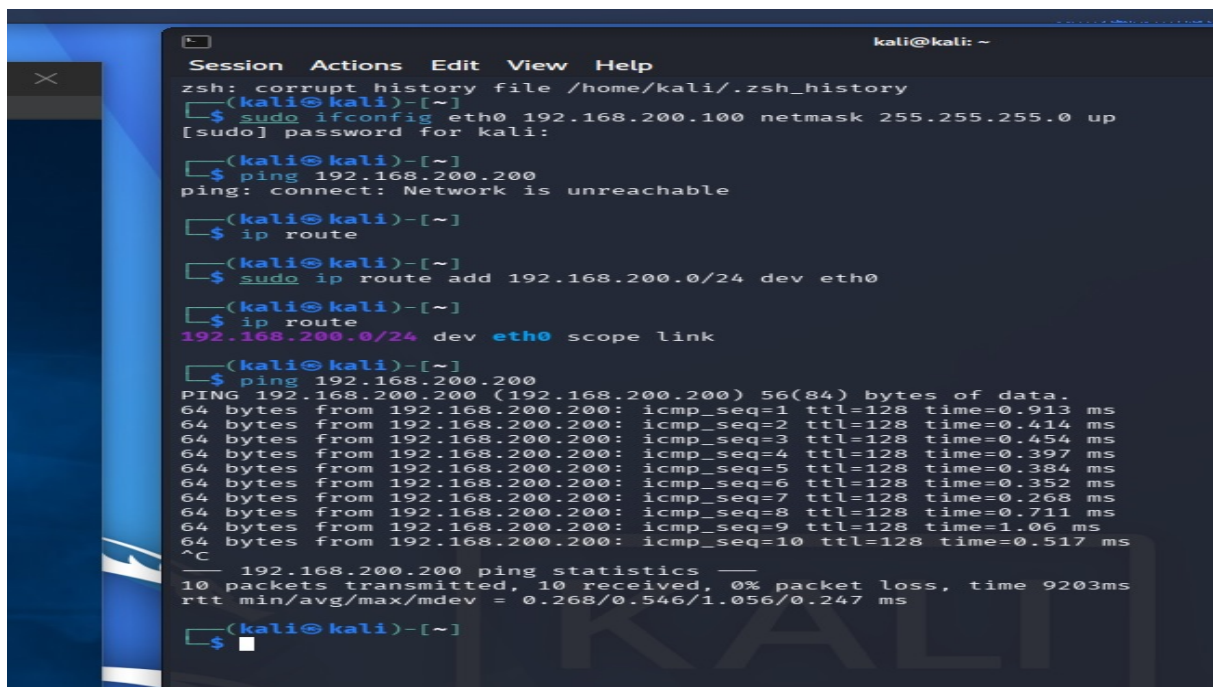

1. Configurazione rete: Kali 192.168.200.100 e Windows 192.168.200.200. Problema iniziale di comunicazione risolto uniformando il nome della rete interna VirtualBox e configurando correttamente la route su Kali.
2. Ricognizione con Nmap: individuati i principali servizi esposti (SMB 445, RDP 3389, IIS 80, Apache Tomcat 8080/8443).
3. Exploit: utilizzo del modulo exploit/windows/smb/ms17_010_eternalblue. I timeout iniziali sono stati risolti modificando TARGET=8, WfsDelay=60, VERIFY_ARCH=false e VERIFY_TARGET=false. Ottenuta una sessione Meterpreter.
4. Evidenze: sysinfo ha identificato Windows 10 Build 10240 x64; ipconfig ha confermato l'indirizzo IP 192.168.200.200; webcam_list non ha rilevato webcam.
5. Screenshot: il comando screenshot inizialmente falliva perché la sessione era associata a un servizio. Dopo la migrazione verso un processo desktop (migrate) è stato possibile acquisire lo screenshot del desktop.

Evidenze finali

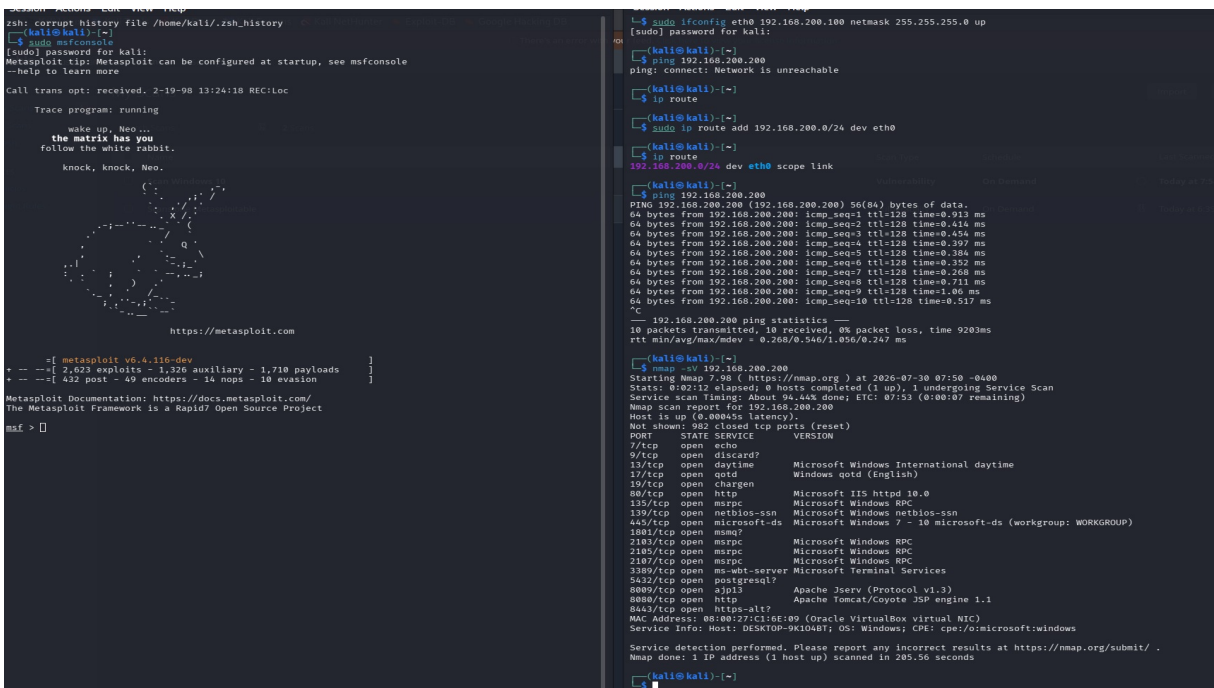

Voce	Esito
Macchina	VirtualBox
Rete	192.168.200.200 /24
Webcam	Nessuna
Screenshot desktop	Acquisito

Configurazione IP

Connettività

Scansione Nmap

Exploit e raccolta evidenze

The screenshot shows a Windows 10 desktop environment. A Task Manager window is open, displaying a list of running processes. The processes are organized into columns: PID, Name, Architecture, Session ID, User, and Path. The list includes system services like svchost.exe and user applications like explorer.exe. A terminal window in the bottom right corner shows the output of a netmap scan, indicating that the scan was successful and that the target is a Windows machine.

PID	Name	Architecture	Session ID	User	Path
1612	svchost.exe	x64	0	NT AUTHORITY\SYSTEM	C:\Windows\System32\svchost.exe
1788	svchost.exe	x64	0	NT AUTHORITY\SYSTEM	C:\Windows\System32\svchost.exe
1796	svchost.exe	x64	0	NT AUTHORITY\SYSTEM	C:\Windows\System32\svchost.exe
1864	svchost.exe	x64	0	NT AUTHORITY\SYSTEM	C:\Windows\System32\svchost.exe
